## L801 Optional Rewinder

The L801 Series' optional motorized core rewriter is a robust, reliable addition to your L801 Digital Label Printer. It handles labels up to 8.5" wide and can rewind rolls having an outside diameter up to 8.0". Rolls are rewound onto a 3" core.

Selectable direction of rotation, clockwise or counterclockwise, allows the rewinding of labels both face in and face out. Thanks to its revolutionary design and solidly manufactured quality, the L801 rewriter is perfect for high usage and heavy duty jobs. Roll weight will never be a problem again!

The motor is located inside the core holder. Once the job is complete, removing the core holder and the completed roll is quick and easy.

## Rewriter Specifications

### Specifications

- Model LMCH27RU2MT, part number 23125
- Outside diameter, up to 8"
- Width of stock, up to 8.5"
- Core size, 3"
- Speed, up to 27 RPM

### Power

- AC Input – 100-240V 1.8A, 50-60Hz
- DC Output – 24V 2.5A
